Galaxy Tab S7+	12.4"	No	No	Yes	No	
Xaiomi Pad 6	11"	No	No	Yes	Yes	

Note: No = either the tablet is not Bluetooth compatible, does not fit (too large or small in that orientation) or it will make the Kubi top heavy in that orientation. Button interference with arm ends is considered a "not fit". In some "Yes" landscape cases tablet must be rotated so tablet's top button is at bottom in relation to Kubi arm ends.

Note: Compatibility requires Bluetooth 4.0 or higher independent of tablet brand

Note: Kubi is not compatible with tablets using MS Windows OS or Amazon Fire OS. Windows computers/tablets can be used to control a Kubi with Windows Widget but not as the Kubi tablet. 2019 and newer Chromebook laptops can control Kubi with Kubi Connect Android App.
